

STAY IN THE ZONE

Quickly adjust focus as you change working distance or to accommodate patient movement

Multifocal Objective Lens

- Set up faster with less repositioning
- Maintain ergonomic posture
- Fine-focus without moving microscope body or binoculars
- Retrofittable to any Global Microscope

**6" TOTAL FOCAL
ADJUSTMENT**

We make it easier!

GLOBAL
SURGICAL™ CORPORATION

ANY PATIENT. ANY POSITION. ONE LENS!

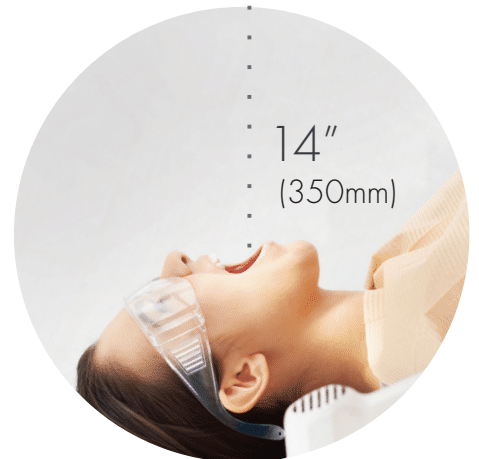

The multifocal lens helps you focus the microscope more efficiently by limiting the need to reposition and allows you to maintain your working posture.
